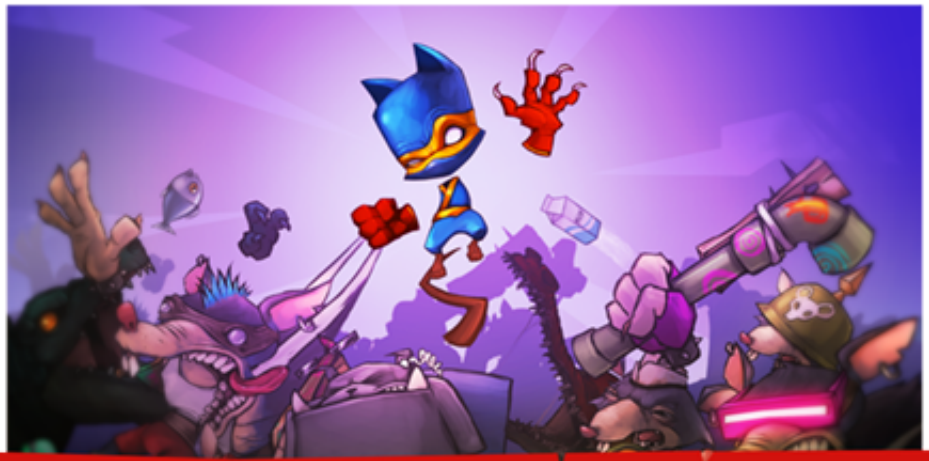
About This Game

Punch and claw your way through forty fast paced levels of pure mayhem, while honing your Ninja Cat skills, in order to rescue your Master from the evil claws of an unknown enemy.



SUMMARY

Claws of Furry creates a blend of today's fast paced action with classic arcade Beat'em up badassery. With four distinct environments with unique enemies, the challenge is always evolving. Multiple modes such as Rogue-like and Arena, and unlockable outfits with unique bonuses, will keep you coming back for more. Fear not the rogue-like though; with the Pussycat mode you can play the game with checkpoints in every level, in a classic linear adventure. This will not make it much easier though, fast reflexes and a keen eye are required in order to survive the journey to free your Master. You don't have to take this journey alone though; **you can have a group of up to four people in local co-op**!

HOW CAN INV MY FREIND !!!!!!!!!. It's a nice casual game to play with friends or family members.
Singleplayer was a bit short, however all the characters you play against were super fun to play against. Most fun parts of the game are boss fights and their humor touch.

If I wished for one thing that game could get in future it would be multiplayer mode via internet.
Local co-op feels a bit limiting, cos you got to have your co-players on the same local network.

Local co-op is a nice addition to the game, it has revive feature so if any of the players by any chance runs out of health, teammates can take care of revive ...
