About This Game

Metori is a strategy sandbox game reminiscent of older arcade games. Control many ships, and use tactics to outmaneuver and outnumber everyone else.

Build a fleet. Capture territory. Defeat your enemies.

Note: Metori is *not* a twin-stick shooter. It is built to be playable with one hand, making it **accessible** to many gamers.

Features

- Fully fledged AI Commanders!
- Sandbox Gameplay

Content

- Randomly generated Asteroid fields
- Many ship types with variants
- 3 different commander modes
- Campaign

-
- Replayable Instant Action Missions

New racial trait and quality of life improvements arrive in Galactic Civilizations III v3.05:

Happy Fall, everyone!

The Galactic Civilizations III team has been working on some updates and adjustments to the core edition that they're excited to share with you... in the form of a poem. You can thank Kael for this one.

Features

- Added a new racial trait, Aeroponics which allows that race to build a special low yield farm on any terrain with the Xeno Adaptation technology (requires Crusade).

Fixes

- When you willingly start a campaign,
A fleet may be spawned without name,
If you click on that fleet - the result, bittersweet,
Will engender a crash in our game.
- Fixed the Trial by Fire achievement.
- Fixed the Perseverance so it can now correctly colonize extreme worlds even if the player doesn't have the tech.
- Fixed an issue scavenging a trade ship where it wouldn't have a home port anymore.
- Fixed an end turn crash (thanks for all the reproducible saves!).

. v3.2 for Galactic Civilizations III is now available!:

Adjustments to personality traits for factions and AI decisions are among improvements. **The Galactic Civilizations III: Retribution Expansion is Now Available!:**

The expansion includes Hypergates, Precursor Artifacts, New Civilizations, and more.. Galactic Civilizations III - Heroes of Star Control: Origins DLC is now available!:
